

## **OVERVIEW:**

A Research Assistant internship is available at the Mütter Research Institute (MRI.) The work requires a background in biology, chemistry, and/or history with excellent organization, communication, and writing skills. Applicants will be expected to conduct research independently, maintain research records effectively, and report to the Director to update research progresses. The position offers an excellent training opportunity to conduct research in a variety of fields such as epidemiology, ancient DNA, historical cemeteries, and the history of medicine in Philadelphia.

## **DUTIES:**

- Assist the Director of the MRI in multiple research projects.
- Keep records of the status of each project, and facilitate the communication of the PI's of each project with the Director.
- Conduct supplemental research for the various research projects and write up reports.
- Enter research data into the system.
- Performs other duties as assigned.

## **QUALIFICATIONS (Education & Experience):**

### **Minimum Qualifications:**

- Bachelor's degree with major coursework in biology, chemistry, and history.

### **Preferred Qualifications:**

- Archival research
- Experience in writing academic papers and conducting scientific research.
